CONCEPT NOTE

EZULWINI AFRICA · RAISE NOW OPEN

Systemised farming. Local ownership

13 November 2026

New farmers fail on capital, buyers, systems and seasonal income all at once. Ezulwini builds the farm and runs it on one operating system, so it is commercially stable and investable from day one.

R1.44m
Dullstroom pilot revenue, FY26 actual, with R337k farm-level profit

R2.46m
EBITDA per annum at each co-owned four-tunnel network farm, after its fee to head office

R4.3m
Hekpoort EBITDA per annum at only 70% of modelled output

Jul 2027
Hekpoort and head office cash positive, before any new farm

What, proof, opportunity

What	Controlled-environment farms, built to one standard and run by local teams on one operating system: training, a farm app and data, back office and market access.
Proof	Dullstroom has traded for four years and is profitable at farm level, run by a local team of six trained on site.
Opportunity	Black farmers hold an estimated 5 to 10% of commercial production. A farm that is stable from day one gives first-generation farmers a real route into ownership, and gives capital a repeatable unit.

The farm team in the grow tunnel, Dullstroom.

How it works

Ezulwini designs, builds and commissions each farm, then runs every farm on the same system, backed by trainers and specialists from the Hekpoort hub. Each new farm is co-owned with its farmer, who works towards 60%, and pays head office a R1.2m setup margin once and a 6.5% service fee annually.

UNIT, PER ANNUM	REVENUE	EBITDA	MARGIN
Dullstroom pilot, 1 tunnel	R1.44m	R272k	19%
Network farm, 4 tunnels	R7.65m	R2.46m	32%
Hekpoort at 70% output	R10.46m	R4.31m	41%

The raise and what each close achieves

Raising **R20m**, blended debt and equity: a convertible note at 13% per annum, convertible up to half at a R50m post-money cap. A lead investor is welcome to shape the final terms.

1. **FIRST CLOSE · R8.75M · 30 NOV 2026**
   Hekpoort becomes a fully tested, cash-positive unit, and head office has a tested service it can sell.

2. **MID CLOSE · R5.25M · 31 MAR 2027**
   Dullstroom and Hekpoort run the whole business cash positive, with a full curriculum to build the pipeline.

3. **FULL CLOSE · R6.0M · 30 JUN 2027**
   Hekpoort is free of bank debt and anchors the first network farms. Two builds start in the year to February 2028.

The numbers

YEAR TO FEBRUARY	2028	2029	2030	2031
Network farms	1	3	5	9
Group revenue	R15.2m	R19.8m	R24.1m	R28.5m
Group EBITDA	**R4.4m**	**R6.0m**	**R9.0m**	**R12.5m**
Coupon cover, base case	1.9x	2.3x	3.5x	5.4x
Coupon cover, Hekpoort at 70%	1.1x	1.2x	2.1x	3.8x
