

UPTURN OPERATIONS (PTY) LTD, TRADING AS UNIFORMITYS

UNIFORMITYS

12 November 2026 · Confidential

Parents in Kabokweni want school uniforms and will pay for them. Most schools around them have no supplier at all. Uniformitys is that supplier, moving to local manufacture and bringing pride to kasi schools.

Indicative and confidential. The offer is proposed, and its terms are subject to legal and accounting review before any agreement.

01 SUMMARY AND THE OFFER

Uniformitys is raising **R5m** to build a uniform factory and shop in Kabokweni, Mpumalanga. Four schools are fully on board and it has sold to a handful of others, but it can serve only about 10% of their learners, because bought-in stock from Johannesburg takes up to three months. The next 5 or 6 schools are ready for a full ramp-up, and 23 schools in the area have expressed real intent to make Uniformitys their supplier. With local production, each school is worth about R1m per year, and the business turns cash positive from 2028.

AMOUNT	**R5m**, in three tranches: R500k, then to R1.5m, then to R5m
STRUCTURE	R3m secured note at prime plus 2% (12.75% today) · R2m equity for 20% of Upturn Operations (pre-money R8m)
MIN. TICKET	R250k, in the note or equity
MIN. CLOSE	R1.5m (Tranches 1 and 2) for stock, premises and the shop, covered by the note
SECURITY	First bond over the Kabokweni property and a bond over the production equipment
REACHES	Full local production for the 2028 season; cash positive in 2028; no further raise planned

Uniformitys has been backed since 2024 by N+1: Impact Venture Partners, which runs its accounts, systems and strategy support.

02 WHAT, PROOF, OPPORTUNITY

WHAT	Uniformitys provides school uniforms where parents live and work in townships, moving towards local manufacture and bringing pride to kasi schools.
PROOF	Four schools are fully on board and Uniformitys has sold to a handful of others. The next 5 or 6 are ready for a full ramp-up, and 23 schools have expressed real intent to make it their supplier. Schools invite Sphiwe to parent meetings and give him space for pop-up stalls on their grounds.
OPPORTUNITY	No one supplies these schools locally. Parents travel up to 40 km by taxi to town to buy generic uniforms and try to match colours and badges themselves. Existing schools have never had a local supplier, and new schools open every year.

Sphiwe with uniform samples, Kabokweni.

THE PROBLEM

1. Most schools around Kabokweni have no uniform supplier at all. Many had no formal uniform until recently, and hardly any have full uniform adoption. Parents want uniforms and will pay for them: this is an availability problem, not a demand problem.
2. Local options are a few informal traders and home sewers, with uneven quality and no school branding.
3. Uniformitys started as sourcing and distribution. Bought-in stock sits at the bottom of Johannesburg makers' queues, with waits of three months or more, reaching only about 10% of learners at the schools it serves.
4. The founder grew up with this. Sphiwe Masinga, 30, started building Uniformitys in 2024 while working in a call centre, and went full time on 1 January 2025.

03 HOW UNIFORMITYS WORKS

Uniformitys signs up a school, agrees its uniform list and specification, then sells direct to that school's families. The school pays no deposit and carries no cash-flow risk, which is why schools commit.

STEP	WHAT HAPPENS
1. AGREE THE SCHOOL	Sphiwe works with the principal or uniform committee on design, colours and crest. Emtfonjeni Secondary has signed a letter of intent.
2. SELL TO FAMILIES	Parents order through WhatsApp, at pop-up stalls on school pickup days, or at the counter. They pay by card, payment link, cash or lay-by.

3. MAKE	Cut, sew, brand and finish. Today 3 tailors on 3 machines make about 40% of garments; the rest is bought in from Johannesburg.
4. DELIVER	Collection at the workshop or delivery to the school at the start of term.

WHAT THE RAISE CHANGES

TODAY	AFTER THE RAISE
Workshop at the founder's home, 3 machines	Own premises in Kabokweni with a shop and stockroom
About 10% of learners served at each school	Every learner's uniform made and stocked locally
Lead times of up to three months on bought-in items	Days to three weeks on made items
Stock tracked on paper	Ordering, payment and stock system feeding production planning
Team of 5	Team of 14 from mid-2027, 20 by 2031

A second revenue line follows the embroidery and printing equipment: kit and branding for local businesses, churches and sports clubs, which today order from outside the township. The base case counts R100k in 2027, growing to R1m by 2031.

04 THE SINGLE UNIT: ONE SCHOOL, FULLY SERVED

The unit is one secondary school of about 1,000 learners, every one of whom needs a uniform. In the base case each learner spends R1,000 per year, so a school is worth R1m per year, reached in its first year. The only limit is production capacity.

PER SCHOOL	FLOOR	BASE	UPSIDE
Spend per learner / year	R750	R1,000	R1,500
Revenue per year	R750k	R1m	R1.5m
Gross margin	45%	50%	50%
Contribution / year	R300k	R450k	R675k

Tailor at work in the Kabokweni workshop.

BREAKEVEN

The full factory's fixed costs in 2029, staff and running costs, are about R2.23m. At 2029 prices, about R1.1m per school, roughly **5 fully served schools** cover them, against a pipeline of 23 schools.

05 FORECAST, 2027–2031

In the base case revenue grows from R4.0m in 2027 to R20.4m in 2031 as Uniformitys moves from 6 to 16 fully served schools. EBITDA is R136k in 2027, R2.95m in 2028 and R6.25m in 2031.

R	2027	2028	2029	2030	2031

Schools fully served	6	10	12	14	16
Revenue	4.00m	10.80m	13.73m	16.96m	20.45m
Gross margin	45%	50%	50%	50%	50%
Staff costs	1.04m	1.37m	1.63m	1.91m	2.23m
EBITDA	136k	2.95m	3.95m	5.06m	6.25m
Net profit	-517k	1.74m	2.23m	2.98m	3.87m
Year-end cash	1.26m	2.17m	3.89m	3.38m	3.76m

R20.4m
revenue by 2031, base case

R6.25m
EBITDA by 2031, base case

2028
cash positive

Drivers: schools served (6–8 on first equipment, ~12 at the full factory from 2029, then a few machines and hires per year, paid from cash flow); R1m revenue per school at 2027 prices, growing 5% per year; margin at 45% in 2027 rising to 50% once production is local; costs from a R60k/month team from January 2027 to R114k/month at the full factory; branding revenue growing from R100k to R1m. Dividends start in 2030 from half of cash above R1m, which is why that year's cash dips.

06 USE OF FUNDS AND MILESTONES

The R5m comes in three tranches: **R500k → R1.5m → R5m**. Tranches 1 and 2 together, R1.5m, are the minimum close: they put Uniformitys in its own premises with stock for the 2027 season. Tranche 3, R3.5m, builds the full factory.

TRANCHE	AMOUNT	USES	MILESTONE
1. STOCK & TRADE	R500k	Raw materials R175k · shop & tailoring team Jan–Mar R180k · machine loan arrears R90k · accounts, systems & buffer R55k	Sells hard into Jan–Feb 2027
2. PREMISES & SHOP	R1m (to R1.5m)	Property incl. transfer costs R863k · shop counter R40k · ordering & stock system R50k · jersey stock R48k	Shop open by mid-2027, serving 6–8 schools
3. LOCAL PRODUCTION	R3.5m (to R5m)	Equipment R2.23m · contingency R130k · bulk fabric R300k · team build & runway R842k	Full factory for the Dec 2027–Feb 2028 season
TOTAL	**R5m**		Cash positive in 2028

THE EQUIPMENT IN TRANCHE 3

ITEM	AMOUNT
Sublimation printer and heat press	R770k
Embroidery machines and software	R373k

DTF printer	R348k
Sewing and finishing line, 12 machines	R322k
Delivery van	R232k
Knitwear machines, cutting tables, design PC	R183k
Total, rounded	**R2.23m**

Main items are quoted by South African suppliers. A laser cutter (about R400k) is left out of the raise and bought from cash in 2030. Contingency is 10% on lines without a firm quote, 5% on quoted lines.

07 THE OFFER

R5m to build the factory and shop in Kabokweni: a R3m secured note and R2m of equity for 20%.

1. **Minimum ticket and minimum close.** Minimum ticket R250k, in the note or equity. The minimum close is R1.5m, which the note covers.
2. **What each tranche funds.** R500k stocks the 2027 season; R1.5m opens the premises and shop with stock; R5m adds the production divisions and the team.
3. **How the money comes back.** The note is repaid in equal instalments from 2028 to 2032 after one year of capitalised interest. Equity returns through dividends from 2030, paid from half of the cash above R1m, and through the value of the stake.

WHY THIS STRUCTURE

1. Most of the money buys hard assets: R863k of property and R2.23m of equipment, which suits a secured note at a cost the business can carry from 2028.
2. The note is sized to the floor case: even at R750k per school the business is EBITDA-positive from 2028 and repays the note in full, using a one-off capital holiday if needed.
3. Equity takes the production ramp risk and shares in the upside: each school above the base adds about R450k of contribution a year.

Uniformitys is open to an investor’s own term sheet.

08 YOUR POSITION

A R250k ticket buys 2.5% of Upturn Operations in equity, or a R250k share of the secured note. Base-case returns below assume investment at the start of 2027.

R250K TICKET	EQUITY	SECURED NOTE
What you hold	2.5% of the shares	A share of a R3m note, secured on property and equipment

Cash back by	End 2031 (dividends plus stake value)	End 2032 (instalments from 2028)
Total back	R905k	R398k
Multiple of money	**3.62x**	**1.59x**
IRR	**29.8%**	**12.75%**

Stake value at end 2031 is EBITDA at 4.5 times, less the note, plus cash. Realising it needs a buyer or a buy-back.

THREE SCENARIOS

	FLOOR	BASE	UPSIDE
Revenue / school / year (2027 prices)	R750k	R1m	R1.5m
Schools fully served by 2031	14	16	16
Revenue 2029	R8.77m	R13.73m	R20.35m
EBITDA 2029	R1.28m	R3.95m	R6.93m
EBITDA 2031	R2.56m	R6.25m	R10.63m
Lowest year-end cash	R208k	R1.26m	R1.80m
Lowest debt service cover	0.77x	3.09x	5.56x
Equity multiple by 2031	1.15x	3.62x	6.50x
Equity IRR	2.8%	29.8%	46.5%

At the floor the business is EBITDA-positive from 2028, but that year's earnings cover only 0.77 times the first note instalment. Cash on hand covers the gap: it stays positive, at about R208k at its lowest, without using the one-off 12-month capital holiday, and the note is repaid in full. From 2029, when the covenant is first tested, the floor case covers debt service 1.34 times, above the 1.2x minimum.

09 RISKS AND ANSWERS

RISK	WHAT COULD HAPPEN	OUR ANSWER
EARLY-STAGE RECORDS	Stock is tracked on paper and the books are still being brought up to date	The ordering, payment and stock system goes in with the raise; monthly management accounts from 2027
SPEND PER LEARNER	Families spend less than R1,000 per year	At the floor of R750 per learner the business is still EBITDA-positive from 2028 and repays the note; hiring and growth capex slow to match

SCHOOLS SIGN SLOWLY	**WHAT COULD HAPPEN** Four schools are fully on board; the wider pipeline rests on expressed intent and one signed letter of intent	**OUR ANSWER** About 5 schools cover fixed costs; hires are released only as schools sign; written intent from each 2027 focus school before Tranche 3
ONE FOUNDER	**WHAT COULD HAPPEN** Sphiwe holds the school relationships and runs production	**OUR ANSWER** A sales and shop manager joins in 2027; senior leads in each division; N+1 runs accounts and systems
PRODUCTION RAMP	**WHAT COULD HAPPEN** New machines and staff take time to reach quality and speed	**OUR ANSWER** Divisions start mid-2027, six months before the main season; current tailors train the new team; bought-in supply stays as backup
SEASONALITY	**WHAT COULD HAPPEN** Most sales fall in December to February	**OUR ANSWER** Stock built ahead; lay-by and pay-now-collect-later spread payments; branding and matric wear sell all year
PROPERTY	**WHAT COULD HAPPEN** Title, zoning or transfer delays	**OUR ANSWER** Quote valid to April 2027; a second building is an option; production can start in the current space

Learners at one of the 23 schools that have expressed intent to make Uniformitys their supplier.

Five schools get Uniformitys to breakeven. Twenty-three are waiting.

ANNEX: INDICATIVE TERM SHEET

Indicative only and not an offer of securities. To be reviewed by a South African corporate lawyer and accountant before any term is agreed.

A. SECURED NOTE

TERM	PROPOSED
Issuer	Upturn Operations (Pty) Ltd, trading as Uniformitys (Reg. 2023/651080/07)
Amount	R3m
Interest	Prime plus 2%, 12.75% today
Interest holiday	Capitalised in 2027
Repayment	Equal annual instalments, 2028 to 2032
Security	First bond over the Kabokweni property and a notarial bond or cession over the production equipment
Covenant	Debt service cover of at least 1.2x, tested yearly from 2029
Relief	One-off right to a 12-month capital holiday, with interest paid
Minimum ticket	R250k
Use	Tranches 1 and 2 (R1.5m), with the balance to Tranche 3

B. EQUITY

TERM	PROPOSED
Amount	R2m
Instrument	Ordinary shares
Stake	20% on a fully diluted basis after the raise
Pre-money value	R8m
Minimum ticket	R250k
Use	Tranche 3: production equipment, team build and runway
Dividend policy	From 2030, half of year-end cash above R1m, subject to the note and solvency and liquidity tests
Information	Monthly management accounts; annual financial statements
Board	One seat for equity investors as a group
Exit	Tag-along and drag-along; a buy-back option for the company from 2031 at a value set by an agreed formula

SHAREHOLDING AND SHAREHOLDER LOANS
